61955	6/16/2025	6/18/2025	Unknown	Open Burning Scrap Tire Used Oil	Fair Grove /Polk	SWRO	WH	Site Visit
Concerned Party:		John Mannerino						
Concern Info:		"2 seperate time these people were burning tires. They are located in Polk Co. On hwy AB just west of 177th rd. They are being unloaded there from a local tire shop. Last occasion was this past Friday and a neighbor called 911. There are numerous old rv's on site that they are living in. Also they are working on vehicles and I have witnessed them dumping oil in the bushes as I was driving by. This needs to be stopped. The Polk Co. Sheriff told me this is a DNR issue. What a person does on his property is his business, but when it makes it's way onto mine I have a issue. We are tired of smelling burnt tires, and are concerned over contamination of our ground water."						
Conclusions:		SharePoint #13975 This concern was originally listed with an unknown RP. After learning that Cody Armstrong was the RP, a previously received concern was found in department records. Concern #13103 was received April 10, 2025 and was investigated April 15, 2025. As a result of that investigation a Letter of Warning was issued for Solid Waste and Air Pollution violations regarding the burning of tires among other materials. This has since been escalated to a Notice of Violation. The department will continue to follow-up on this issue via this original concern. On July 10, 2025 I followed up with the CP in an attempt to notify them regarding ongoing actions and to verify the location of their used oil observations mentioned in the concern. The CP was unable to narrow down a more precise location at the time due to the observations being made in passing along the road.

61959	6/17/2025	6/24/2025	Shawn Schuyler	Scrap Tire Dump Open Burning	Pleasant Hill /Cass	KCRO	MU	Phone Conversation
Concerned Party:		Elizabeth						
Concern Info:		Concerned party states there are approximately 200 scrap tires on property and tires have been burned, fire department is aware. The tires have been burned as recently as 2025, but is not an active burn. Cass County is aware and has had enforcement actions in the past.						
Conclusions:		CP given relevant information.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61970	6/17/2025	7/20/2025	Mulberry Limestone	Stormwater Contamination Fugitive	Joplin /Jasper	SWRO	TH	Phone Conversation TODS
Concerned Party:		Gloria Gideon						
Concern Info:		CP stated that Mulberry Limestone is operating a quarry and is leasing the land from A-1 Quality Stone and have not obtained a permit. CP also stated that there is extensive runoff and track out to the road, sometimes reaching Hwy 249. They are also not controlling air pollution. CP stated that Mulberry is operating beyond the land that A-1 is leasing to them.						
Conclusions:		SharePoint #14004 Unsatisfactory Findings Report to be issued.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61973	6/18/2025	6/18/2025	Perry County PWSD #1	Odor	Perryville /Perry	SERO	MW	Phone Conversation
Concerned Party:		Gabe Geringer						
Concern Info:		CP States: on PWSD 1 in Perryville (Used to be called Brewer Water). Water has a smell like sulphur or rotten eggs for the past 30-45 days and doesn't seem to be improving. CP contacted water district but it did not address the issue. Mentioned no issues for last five years until last month or two.						
Conclusions:		I worked this concern by phone on the morning of June 18, 2025. I first contacted chief operator Alan Weisler and he stated that the district had not received any odor concerns and he wondered if it might be the CP's water heater anode. I asked Alan if he could possibly flush Sandler Drive to freshen the water and he said he would. I then contacted the CP Gabe Geringer about his concern. He said he had noticed the odor for about 30-45 days and wondered if it was safe. I explained to the CP that it was hydrogen sulfide gas and was not harmful but is aesthetically displeasing. I also explained to the CP that the department does not regulate taste, odors, or water discoloration but we do regulate the bacteriological/chemical safety of the water. I told the CP that the operator plans to flush Sandler Drive and that might help with the rotten egg odor. During the phone conversation, the CP stated that he had a tankless hot water heater (no anodes) and he noticed the odor in both the hot water and the cold water.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62017	6/23/2025	7/9/2025	Gregg Durnell	Animal Waste Open Burning	Archie /Cass	KCRO	CK	Phone Conversation
Concerned Party:		Adam Shumock						
Concern Info:		From Merlin report : The caller reports that a neighbor has been dumping chicken waste (poop) in the property next to their home and burning it. This has been ongoing for several weeks. The caller has reached out to the local police and fire department and has not gotten any response. The caller doesn't believe this is related to farming activities. The odors have gotten so bad on his property that they are having health problems and cannot stay in their home.						
Conclusions:		The responsible party is burning wood and chicken litter to make potash for their garden. The burning does not appear to violate Missouri's open burning regulation; the material is not being burned as a means of disposal, and the burning appears to be associated with an agricultural operation related to the growing of crops. Because of concerns for the health implications of breathing the smoke, this concern is also being referred to the Cass County Health Department.

62018	6/23/2025	6/26/2025	Lee Haven Apartments	Asbestos	Lee's Summit /Jackson	KCRO	DS	Phone Conversation
Concerned Party:		Terri Hess						
Concern Info:		Via KCRO mailbox from APCP Receptionist - Saturday, June 21, 2025 12:25 p.m. - Subject: Asbestos Floor Tiles I am a resident at Lea Haven Apartments in Lee's Summit, MO, managed by Lee's Summit Housing Authority. They have just renovated about six units here, and another 10 will be done soon. They are chipping up all the old floor tiles (540 sq ft in each 1-bdr, maybe 700 in 2-bdrs) and just throwing it loose into the dumpster. I questioned whether the tiles contain asbestos since these were built in the early 1960s. They say the old asbestos tiles were replaced sometime in the past, but offered no proof when suggested. The tiles were all carpeted over except kitchen/entry/bath, so there would have been no reason for that to be done, and I've seen damaged tiles in some units that never were repaired or replaced. Can someone please look into this? They eventually want to replace all the tiles in every unit (100) with laminate floors. I also wonder if the old drywall and ceiling texture contains asbestos. Nothing is done to contain dust when making repairs to that, either. Residents here are elderly and/or disabled and don't need more health issues!						
Conclusions:		Renovation work, including removal of existing carpet and floor tile, was conducted with first inspecting the area for asbestos. Lee's Summit Housing Authority and Stevens Services LLC will receive a report with unsatisfactory findings due to failure to inspect. An inspection will be required to return to compliance; the responsible parties agreed to discontinue tile removal and have the area inspected.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62028	6/11/2025	6/16/2025	Kendall's Heavy Towing and Recovery - Holts Summit	General Water Quality Used Oil Odor	Holts Summit /Callaway	NERO	TC	Report
Concerned Party:		Coleton Rademan						
Concern Info:		The concerned party and tenants are smelling gasoline/diesel fuel in the area. The tenants have witnessed employees dumping gasoline/diesel fuel and petroleum oil onto the ground. The concerned party stated there is a creek in the back of the property where the dumping could end up in. The dumping location is behind the building where there are several vehicles and campers. The concerned party stated the property is up for sale and they are worried that someone else would inherit the mess. The concerned party stated the smell has been going on for a couple of months.						
Conclusions:		The facility was determined to be in compliance with the Missouri Clean Water Law and Clean Water Commission Regulations based on the findings of the investigation. For more information, please see the investigation report.

62059	6/26/2025	7/1/2025	Holiday Lakes	Open Burning Residential	Odessa /Lafayette	KCRO	DS	Phone Conversation UF
Concerned Party:		Kimberlee Shook (Fire Chief)						
Concern Info:		Via Webform - Submitted at 12:15 pm Thursday, June 26, 2025 - Date of Incident or First Noticed: 05/30/2025-Property located at 6809 Sawmill Valley Rd Odessa, Mo. 64076 There is only 1 legal house on the property and the owners are fearing for themselves due to all the illegal activity at Holiday Lakes. I am the fire chief for Odessa and wanted to make you aware of the situation because I believe there are several other concerning factors there. It use to be use to be an old campground the Lafayette County Commissioners are aware of the situation and have tried to find owners but several people are illegally living out there as squatters. There is no sewer, or water to several of the residents living there. Not sure where they are dumping that. Recently, they have been illegally burning trash and furniture, etc. into a large burn pile by the shelter house. Our fire department has been out there several times for explosions and fires that are left unattended and when asking the residents they do not know anything. My concern is the hazardous burning and where they are dumping their sewer.						
Conclusions:		Promiscuous dumping and burning of prohibited items are occurring on property owned by Lafayette County. A report with Unsatisfactory Findings will be issued to Lafayette County. Required actions will include the submittal of a plan to address ongoing dumping, burning, and clean-up.

Concerned Party:		Jackson Hill						
Concern Info:		Upper White Water Creek - Old Plantation Access at Millersville, MO, the odor of the water smells like manure. Their shoes smells like manure as well. They did fish, but they did not eat the fish. They "catch and release" the fish. They did notice a drainage ditch on the left and they think they is where is is coming from.						
Conclusions:		On June 24, 2025, I called the concerned party at the provided phone number but could not reach them. The voicemail was not set up, so I couldn't leave a message. I texted the number from my work cell and requested a call back to discuss the concern. On June 25, 2025, I called the concerned party again but was unable to make contact. On June 27, 2025, Trevor Carihfield and I visited the area of concern. From the Old Plantation Access Point, we walked to Whitewater River. I did not notice any unusual odors. The water looked clear, and there was plenty of healthy aquatic life. We then returned to County Road 485 and observed Wolf Creek, which I assumed to be the "drainage ditch" referenced in the concern. We traveled the entire length of County Road 485 until County Road 224. It was noted that Wolf Creek runs alongside County Road 485, and the water appeared clear without any foul odor that whole stretch.

62129	6/20/2025	7/3/2025	Leslie Joseph	Open Dumps Odor	Moberly /Randolph	NERO	AW	Report UF
Concerned Party:		Megan Leinonen						
Concern Info:		On June 20, 2025, the Northeast Regional Office received a concern that Leslie Joseph, a realtor with Century 21, is allowing her son and his friends to dump mattresses, scrap tires, chemical containers, residential waste, and clean fill on a property that she owns at 614 E. Terrill Road. The caller also stated that there is a dump truck full of waste at the property that is filling with water and allowing mold to form on the waste. The caller described negative health impacts to themselves and their children from the mold. The caller also stated that there are "land mines" on the property then described various white goods being accumulated on the property. The caller also complained about odors from the waste and farm animals on the property. Caller stated that there are dead animals on the property. The caller stated that the waste is between the house and the barn. The caller also stated that the son and his friends bring trailer loads of waste to the property, but nobody lives there.						
Conclusions:		Violations of the Missouri Solid Waste Management Law and Regulations were observed. A Report of Unsatisfactory Findings was mailed on DATE. The enclosed report is being issued with Unsatisfactory Findings for the violations identified. Remove and properly dispose of all regulated waste from the concern site; and submit photographs, disposal receipts, and a written statement explaining the reasons for the non-compliance and what actions are being taken by the facility to prevent future reoccurrences.

Concerned Party:		Jake Brendle						
Concern Info:		Cp owns a property that a tenant lives on and was informed that the neighbor to the North was burning and burying waste along the property line where the waterway for water from the instate runs off. Cp says there are bags of house hold trash, a couch, recliner, and mattress springs. Cp says that some waste is buried but that you can still see it. He spoke to the source of concern and was told that it was not the source of concern's waste but that he had paid the neighbor kid to dump and bury it. Cp then spoke to the neighbor kid and he alleged that he was never paid and that it was not all his. Cp says waste is visible from his property as some of the waste is also on his property as well.						
Conclusions:		No evidence of open burning of prohibited items was found; however, Dori Waggoner admitted they burned a couch some time in the past. Regulatory information was provided and a compliance assistance letter will be sent.

62164	7/7/2025	7/16/2025	Evergy - Iatan Generating Station	Fugitive Particulate Matter	Weston	KCRO	DS	Phone Conversation
Concerned Party:		Rob Kelley						
Concern Info:		I work at the Iatan power plant. Since you came out and inspected we have done some repairs to the m.e. Wash system. I have complained along with everyone in my shop about the continued release of slurry into the air. We have to wash our vehicles almost every day because of it. We have asked why this happens and we are told someone took the system out of automatic and forgot about it. We gave them time to get the problem under control and they have not. Several people that know I emailed you before asked me to try again since our leadership will not do their job. Thank you very much for following up.						
Conclusions:		The emissions appear to be limestone used in the scrubber system due to some malfunctioning valves in the mist eliminator system. Evergy has replaced the faulty valves and plans to shutdown the boiler and clean the affected trays. The continuous monitoring systems indicate no excess emissions.

Concerned Party:		Anonymous						
Concern Info:		Via Webform - Inquiry/Question - Submitted at 6:41 pm Wednesday, July 9, 2025						
Conclusions:		The 80 acres behind me was purchased by the owner of tree cutting company. He does work all over the KCMO metro and brings the limbs and wood to the land and burns it. The pit he is doing this in has to be at least 100 long by 40 wide, and is approximately 500 feet from a neighboring home. CLINTON GOVERNMENT is ignoring the complaints on this matter. Is there anything the DNR can do about this? County parcel # is 16-08.1-27-000-000-021.000.						
Conclusions:		No violations were observed during the investigation. Moore is burning vegetation that has originated on the property in preparation to build a personal residence. Vegetation from the business is stored in a separate area and will either be turned to mulch or bio char. Moore advised to inquire about permit needs if he decides to pursue bio char. Information on open burning requirements were discussed and left with Moore.

62220	7/7/2025	7/8/2025	Wrights Recycling	Hazardous Air Pollutant Release	St. Clair /Franklin	SLRO	RA	
Concerned Party:		Anonymous						
Concern Info:		We recieved an anonymous environmental concern from the DNR website. The CP states: Wrights recycling, owner states they crush refrigerators stoves freezers etc. people are always dropping of these items. Could be allot of cfcs escaping and compressor oil hitting the ground. Judging by the fire they had the other day I'd bet the plastics aren't recycled either. Bet they don't even attempt to recover gases or oils. Subdivisions are downstream						
Conclusions:		Referred to the EPA. DNR does not have the authority to investigate cfcs.

62224	6/18/2025	6/24/2025		Asbestos	Fenton /Jefferson	SLRO	RA	
Concerned Party:		Anonymous						
Concern Info:		CP called at 4:08pm in regards to his neighbor having demolition done on his house and the CP believes it to be asbestos based. The workers are "smashing it off the house with hammers" and the CP is concerned about his health. He wanted someone to come out ASAP as the demolition would be completed by the end of day Wednesday.						
Conclusions:		Caller was aggressive and wanted someone out ASAP. Did not get to explain that we are not open on Juneteenth as it is a state holiday, or that I do not know asbestos regulations. CP hung up on me after some expletives. A satellite image search showed the property to be a single-family dwelling, and the face of the house is brick, and the sides appear to be vinyl. Single resident houses are exempt from DNR asbestos regulations. No investigation was conducted.

62227	6/18/2025	6/23/2025	JCH Homes, LLC	Open Burning	Fenton /Jefferson	SLRO	JC	
Concerned Party:		Ryan Lesh						
Concern Info:		Please describe your concern, including the location on the property. I am the fire marshal at Saline Valley Fire Protection District. Our crews ran an illegal burn at 225 Cool Valley Dr, Fenton, MO 63026 on 6/14/25. When crews arrived they located a pit dug in the ground with large gauge electrical wiring burning in the pit with a plastic tote filled with the cleanly burned electrical wire inside. I do have a fire report and a photo from the scene.						
Conclusions:		I performed an onsite investigation and did not find signs of active burning. A review of the Fire department's fire report showed clear open burning violations. I will be issuing a Letter of Warning.

62242	6/18/2025	6/25/2025	Residential	Open Burning	Imperial /Jefferson	SLRO	KC	
Concerned Party:		Ryan Lesh						
Concern Info:		We recieved a open burning concern from the DNR webpage. The CP states: I am the Fire Marshal at Saline Valley Fire Protection District. Fire crews responded to a call for illegal burning at 4729 Kirchoff Lane, Imperial, MO 63052 at 6/16/25. When crews arrived they located trash and other non approved items burning in the back yard of the residence. This has been a problem property for us for the last two years. I have sent letters to the property owner and property resident to cease all burning at the property. I have a fire report that I am able to send as well. Property Owner is out of state and resident is hard to track down.						
Conclusions:		I did not observe any evidence of a fire or burn pile and was unable to access the front door of the house. I did not smell or see smoke, and did not see a burn pile in the front yard. A compliance assistance letter with fact sheets will be sent to the current resident and/or property owner.

62249	7/10/2025	7/15/2025	Unknown	Open Burning	/Stone	SWRO	CR	Other
Concerned Party:		Anonymous						
Concern Info:		The reporting party stated that an uncontrolled burn is continuing to happen next door to her residence. She has spoken to the responsible party and he acts like he doesn't care. She has called the fire department and got no response, and has even spoken to the sheriff. The sheriff referred him to MDNR. RP stated that vegetation is being brought in from other properties. No water is available to put out the fire. The smoke is really bad, even in the late evenings.						
Conclusions:		SharePoint #14283 No violations were observed at the time of the investigation. If identified, the responsible party will receive open burning regulatory information. The local fire protection agency will also be contacted to share open burning regulations.

62250	7/2/2025	7/9/2025	Tipton Country Club	Asbestos	Tipton /Moniteau	NERO	BH	Report
Concerned Party:		Jeff						
Concern Info:		States Tipton Country Club is conducting renovations and replacing the roof, suspects no asbestos inspection was done.						
Conclusions:		7-9-25 On-site investigation I met with Brett Randall, manager, at the Tipton Country Club. I explained to Brett I was investigating an environmental concern regarding renovation/demolition to the structure specifically the roof. Brett explained he just started working at the Country Club in March but as far as he knew the roof had been replaced in September of 2024 and no work has been completed on the roof since then.I asked Brett if any other renovations/demolitions had taken place on the property and he said no. I explained the asbestos rules and regulations and asked Brett to contact me if he had any additional questions.

62251	7/7/2025	7/8/2025	Paving Contractor	Odor Hazardous Air	St. Louis /St. Louis City	SLRO	RB	
Concerned Party:		John Bunyan						
Concern Info:		We recieved an environmental concern from the EPA. The CP states: There is a paving operation going on causing stomach discomfort and throat irritation. Copious amounts of smoke are being released into the air, asusing people nearby to have the said symptoms. The paver behind the dump truck does not appear to have environmental controls. I was unable to get close enough to get the contractor name. Paving employees are not wearing any respiratory protection.						
Conclusions:		I conducted a site investigation and did not encounter smoke or odor. The paving project was complete. Although the CP stated there was excessive dust, I found none that had left the property line.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62252	6/18/2025	6/24/2025		Odor	St. Louis /St. Louis City	SLRO	RB	
Concerned Party:		Brooke Cooley						
Concern Info:		We recieved an odor concern from the I-70/I-270 Area Odor Complaint Website. The CP states: I was driving south on Macklind with my windows down and a very strong odor came on roughly at the address I listed. An hour later my lungs and throat are still irritated and I am coughing. I have smelled this odor before but this was very strong and immediately caused a throat and lung reaction. I would describe it as acetone smell Potential Source: I am assuming it is coming from a plant or something along that industrial area.						
Conclusions:		A site visit was conducted and i did not encounter any odors.

62256	6/23/2025	6/25/2025	Josh McNeil	Open Burning	Bucklin /Linn	NERO	DB	Letter
Concerned Party:		Anonymous						
Concern Info:		Email states, "Abandon house on the corner of E 1st Street and Poplar St in Bucklin- Address is 47 Poplar Street Bucklin MO 64631- Individual is burning the house a little at a time during late evening and the night. This is not the first incident of a similar situation happening in Bucklin, DNR was called before. Rumored the City officials have knowledge of it. Unsure if it is city property or owned by individuals."						
Conclusions:		At site, observed possible violation of the open burning rule. Contacted owner by phone later, discussed concern. He stated he had initially planned to burn the demolition waste after a fire collapsed the structure, but had decided not to. He stated he was getting estimates for dumpsters or trucks to haul to landfill. Also stated he had burned vegetation around the time the concern was submitted. No violation conclusively identified, sending info letter.

Concerned Party:		Raymond Baker						
Concern Info:		We recieved an odor concern from the I-70/I-270 Area Odor Complaint website. The CP states: This becomes much worse when it is hot out. Bad enough to force you to stay indoors. This is very often and appears that the plant is not being operated properly.						
Conclusions:		No odors were detected during the investigation.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62274	6/23/2025	6/27/2025		Odor	Foristell /St. Charles	SLRO	SL	
Concerned Party:		Samantha Roberts						
Concern Info:		We recieved an odor concern from the I-70/I-270 Area Odor Complaint website. The CP is experiencing a strong manure or farm animal/sewer odor. They first noticed the odor June 18 and are still experiencing it on June 22. The CP wants to know if the smell is from a local farmland or from the meat packing plant in Wright City.						
Conclusions:		During a site investigation an odor was noted, however it was not detectable at a dilution of 7:1. No violations of 10 CSR 10-6.165.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62276	7/11/2025	7/11/2025	Hot Mix Materials	Odor Hazardous Air	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:		Name Withheld						
Concern Info:		Toxic materials are being released into the air from a hot materials mixing plant near Marble Heights at approximately 2701 85th St in KC, MO, next to the railroad tracks across the street from a roofing materials company. It is putting off very toxic chemicals. If the wind is blowing from the north, you can't breathe. If it is blowing from the south, it is not bad, but any other direction it is bad. This has been going on for years. A lot of neighbors agree. It is not a normal tar or asphalt smell. It really takes your breath away. You can't go outside because the very strong odors are making it hard to breathe. It is only about 5 blocks from a school blowing the toxic odors towards the school if the wind is not from the south.						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62277	7/11/2025	7/11/2025	Iron County	Other		SERO	JE	Referred to Other Agency
Concerned Party:		Josh Romines						
Concern Info:		CP States: Part of HWY 21 is closed for several weeks. Due to the closure traffic is cutting through County Road 131 in Iron County. The volume and speed of the traffic is causing extreme dust conditions for those who live along the county road. CP has reached out to County Commissioner, Sherriff Dept and others about the Traffic / Speed control and dust control.						
Conclusions:		Public roadways are exempt from restriction of particulate matter requirements via 10 CSR 10-6.170 (1)(A)- Applicability exemptions: Fugitive PM Emissions from unpaved public roads located in areas not designated as nonattainment for PM.

Concerned Party:		Anonymous						
Concern Info:		Via Webform - Submitted at 7:40 am Monday, July 14, 2025 - Date of Incident or First Noticed: 07/12/2025						
Conclusions:		The whole gym smells like mold. The business is aware and making no steps to remedy the issue because it is a rented space. In Missouri, there are no specific state or federal regulations that set limits or standards for indoor mold growth or individual exposure limits for homes or offices. I informed Club Pilates that the Missouri Department of Health and Senior Services has information about indoor mold on its webpage at https://health.mo.gov/living/environment/indoorair/mold.php, including tips and techniques for mold cleanup. I also advised that if cleanup will result in any renovation, such as removing drywall, texture, ceiling tiles, etc., please be aware that asbestos testing requirements will apply (https://dnr.mo.gov/air/business-industry/asbestos). I also forwarded the concern to the City of Lee's Summit Development Services and Jackson County Public Health for their awareness and in case there are any local requirements that need to be looked into.

62293	7/11/2025	7/23/2025	Martin Marietta Materials, Inc. - Greenwood Quarry	Fugitive Particulate Matter	Greenwood /Cass	KCRO	DS	Email
Concerned Party:		Craig Nelson						
Concern Info:		We have seen less dust than last summer from the mine, although the last few weeks it has picked back up. Today there is a dusty haze in our part of the neighborhood. We just got back from being out of town for a week and our plants/grass are covered with a fine white quarry dust. I don't know if they are doing more blasting, or if the dust is from the crusher. It has been windier the last few weeks too - do they reduce operations when the wind blows stronger? What else can be done to stop this dust?						
		Between Woodland Trails and Lake Winnebago there are thousands of people impacted by this - I cannot imagine it is good for public health.						
Conclusions:		Excessive dust was observed; however, an opacity violation could not be verified. Additionally, some haze was observed off site, but the source could not be verified.						
		The facility investigated the issue and found a valve improperly closed to the spray bar system. The facility corrected the issue upon discovery.						
		Further surveillance will be conducted if reports of excessive emissions continue.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62309	7/15/2025	7/21/2025	Unknown	Odor	/Jasper	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		From webmail form: I work in a medical laboratory, so believe me when I say: I have smelled some truly awful things. But this is one of, if not the worst smell of them all. It's near the intersection of State Hwy 171 and HH Hwy. There are residential areas very nearby, and I'm not sure how they deal with it. Have they not complained? Are their complaints heard? Just follow your nose.						
Conclusions:		SharePoint #14338 No odors were present at the time of the site investigation, no further action is required.

Concerned Party:		Becky Andersen						
Concern Info:		On July 11, 2025, the Northeast Regional Office received a concern stating that Joe is accepting waste from construction sites and other Amish families in large dump trailers. The concerned party told me that Joe has six large pile of waste on the property and he filled in a ravine. Reportedly, Joe burns the piles on occasion. The caller stated that Joe's property is at the southeast corner of Highway 136 and Highway ZZ and has a white house on about five acres. The caller stated that the dumping is occurring near the middle of the property toward the south end. The caller stated that the waste consists of lumber, drywayll, and loose household waste. The caller stated that Joe owns a repair shop called Joe's Repair Shop and they believe that he is also dumping used oil, antifreeze, lead acid batteries, lithium batteries, and other vehicle fluids on the property. Caller stated that the dumping began in March. Caller was unsure of the last name, but thought that it was Schwartzendruber.						
Conclusions:

62445	7/7/2025	7/10/2025	Residential	Hazardous Air Pollutant Release Odor	Troy /Lincoln	SLRO	LZ	
Concerned Party:		Joshua Baerman						
Concern Info:		We recieved an odor concern from the DNR website. The CP states: Hi my name is Joshua Baerman. I live at 41 Danny Ct in Troy,MO 63379. We have lived here for about 4 years and have noticed that my neighbor at: 110 Shawn Ct, Troy, MO 63379 (Jess) Trendy Craft Blanks has been adding exhaust vents/dryer vents outside of her garage to exhaust her fumes/smog from her wood engraving machines in her garage. It has gotten to the point where we have the smell coming into our home without the windows open including our basement and is giving us head aches and my middle child has developed a weird cough that hasn't went away since we moved here. The house was only one year old when we moved here and have tested the air in our home to make sure there isn't anything in or home causing him to cough so much. Two months ago when I noticed she added another vent I went over and asked her if there was anything we could do to get that exhausting out of her roof or anything and she has yet to so I contacted the Lincoln County fire dept and was directed to you. From what I have read online these machines due in fact release toxic organic compounds and I would like to see if you guys can look into this? Also worth noting that we are allowed to have a business address from our house but cant conduct work activity solely at our properties. I cant get any help and you are my families last resort. Thank you for your time. She normally starts her workday around 10-11 in morning and can work sometimes later than dark. If you would like to call me at 636.206.0020 and check before you come out, I can let you know if she is working that day.						
Conclusions:		No violation noted at the time of the visit.

62506	6/9/2025	6/17/2025	Doug Palmer	Open Burning Used Oil	Nelson /Saline	NERO	JH	Report
Concerned Party:		Anonymous						
Concern Info:		Via email, "Owner of listed property consistently burns tires, automotive waste, batteries, oil, and construction debris including insulation and dry wall at times. The resident pours used motor oi and other automotive fluids into the ground. The septic system on site is under the driveway and is full with an overflow line dumping raw sewage into the roadside ditch in front of the house. This entire situation is contaminating our ground water and shouldn't be allowed. "						
Conclusions:		Violations of the Missouri Open Burning regulations and the Missouri Solid Waste Management Law were observed at the time of the investigation.

62514	6/12/2025	6/17/2025	Steven King and Aaron Burrell	Open Burning	Jamesport /Davieess	NERO	JH	Report AC
Concerned Party:		Jamie King						
Concern Info:		"Property is owned by Marilyn Tolen, sister of Steven King, and aunt of Aaron Burrell. Steven and Aaron have been burning tires, automotive interior, couches, and other unknown items, as well as an old shed that had lead paint and multiple unknown items in it. The trailer house on the property is also full of black mold, had tons of animal waste inside, and had been unhooked from the sewer for years before the previous owner passed away, so there are tons of human feces and urine that had been going directly under the trailer into the soil until 2024."						
Conclusions:		No one was present at the time of the investigation. Could not access the property to investigate the concern.

62520	6/12/2025	6/17/2025	Doug Palmer	Open Burning Used Oil	Nelson /Saline	NERO	JH	Report
Concerned Party:		City of Nelson						
Concern Info:		On June 12, 2025, the Northeast Regional Office received a concern stating that Doug Palmer was burning scrap tires in the foundation of a commercial building north of his residence at 106 W. 2nd St. Reportedly, he is burning the scrap tires right next to a youth basketball court and there is concern about the health of children playing basketball. The caller also stated that Doug Palmer's yard is covered by junk vehicles. Reportedly, Doug Palmer drains fluids from the vehicles into a drain pan and dumps the drain pan on the ground. The caller also stated that the septic system is overflowing and was referred to the Water Pollution Unit regarding the septic system.						
Conclusions:		Violations of the Missouri Open Burning regulations were observed at the time of the investigation.

62582	7/15/2025	7/16/2025	Parker-Millard Funeral Service	Odor Opacity	Columbia /Boone	NERO	DB	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Caller reports that the cremation incinerator at Parker-Millard Funeral Service located at 12 East Ash Street, Columbia, has not been operating correctly. Caller stated that the facility's stack has been emitting black smoke and an odor associated with cremation of organic material. Caller also stated that the Fire Department responded to the same situation two weeks ago, but their visit did not correct the issues.						
Conclusions:		At site, found no odors or smoke. Crematory was operating at the time. Discussed with Nick McKague and an employee, he said there was a neighbor who called the fire department on them a while ago saying they were burning down and the FD had found no issues. He said that there are times when overweight individuals are cremated the burn pattern changes and the crematory needs adjustment to ensure proper combustion, but that is generally done quickly.
